Oracle GoldenGate Application Adapter for Logger for Enscribe	Logger
Management Pack for Oracle GoldenGate	GoldenGate Director
Oracle GoldenGate Veridata	GoldenGate Veridata

Media Pack File Structure

Each Oracle GoldenGate Media Pack includes product .zip files and a .zip file containing documentation. The product .zip files contains all files necessary to install and use the Oracle GoldenGate product. The documentation .zip provides the manuals and technical documents for installation and use of the product.

After you familiarize yourself with the contents of the media pack, do the following:

1. Download the product .zip file or access the .zip file on the media provided.

2. Unzip the files.

3. Install the product. See Installation Instructions section below.

4. Refer to the *Readme* file that is installed with the products for more information on the release.

License Keys

Oracle GoldenGate no longer requires a license key for installation. The password license (pw file) is no longer needed. After installing the latest release, you can safely remove the pw file from the installation directory.

While removal of license key restrictions allows access to products, it does not authorize you to deploy the products for production other than what you licensed for such use. All license terms and restrictions specified in your Agreement and ordering documents / order forms remain in full force and effect.

License Support

If you have any questions about Oracle GoldenGate license keys, please contact licensecodes_ww@oracle.com via email with a detailed description of the question.

Installation Instructions

Installation documentation is included in each media pack.
